

Strategic Goals:

The strategic goals of HBFCSL are :

1. To produce honey of the highest quality;
2. To expand the production capacity of its members;
3. To enable members to benefit financially from value-added activities;
4. To develop the community through employment, entrepreneurial activities and the mentorship of unattached youths.
5. The exportation of honey and other hive products such as; pollen, wax, propolis etc.

Students standing , book in hand, ready for the 1st lesson of the day.

The Hanover Bee farmer's Cooperative Society has been registered as a Co-operative since 2010. Prior to that, the group existed as the Hanover Bee Farmers Association for twenty-six (26) years.

Partnership with EFJ

With a grant from the **Environmental Foundation of Jamaica**, HBFCSL is presently mobilizing its members and the wider community to plant 1500 seedlings of flowering plants and to add 150 colonies of bees to the bees population in the area.

This project is aimed at Building Climate Change Resilience of **The Dolphin Head Forest Reserve Communities** through the symbiotic relationship between the bees and the trees.

The trees feed the bees and the bees Pollinate the trees.
